SUMMARY

Full-stack systems developer and Registered Electronics Engineer experienced in building production-ready software systems for government offices and small businesses. Skilled in developing workflow platforms, document tracking systems, finance dashboards, inventory systems, and offline-first Android POS applications. Experienced with React, Next.js, TypeScript, Python, PHP, and PostgreSQL for building full-stack web applications and internal systems.

SKILLS

Programming: Python, PHP, Kotlin, JavaScript, TypeScript

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite, Prisma

Mobile Development: Progressive Web Apps, Kotlin, Android SDK, Room Database, Bluetooth ESC/POS Printing

Tools & Deployment: Git, GitHub, REST APIs, AWS EC2, Render, Vercel

WORK EXPERIENCE

Ministry of Public Works Regional Office - Systems Developer 2025 – Present

- Designed and deployed a centralized document tracking system used by a regional government office to manage document routing, status monitoring, and lifecycle tracking.
- Implemented workflow-aware routing supporting multi-recipient document forwarding across divisions and sections.
- Implemented audit trail and document history tracking for transparency and accountability.
- Designed user-level document visibility and assistant delegation features to support operational workflows.
- Managed system architecture, database design, deployment, and ongoing maintenance of the platform.

Converge ICT Solutions, Inc. - Technical Programmer / Systems Installer 2023

- Programmed and configured integrated hardware–software systems for automation and networking deployments
- Assisted with installation and configuration of network infrastructure and CCTV systems
- Performed troubleshooting and maintenance of deployed technical systems

EDUCATION

Bachelor of Science in Electronics Engineering

- Notre Dame of Marbel University — 2024

LICENSE & CERTIFICATIONS

Registered Electronics Engineer (REE)

Professional Regulation Commission, Philippines — 2025

CS50x: Introduction to Computer Science

Harvard University (edX)

Junior IECEP Officer

Institute of Electronics Engineers of the Philippines

PROJECTS

Ministry of Public Works Document Tracker System

Stack: PHP, MySQL, JavaScript | Deployed on AWS EC2

- Built a workflow-aware document tracking platform used by a government office for monitoring document routing and status.
- Implemented audit trail tracking and document history visibility.
- Designed user-level access control and assistant delegation features.

RVerse Finance

Stack: Next.js, React, TypeScript, PostgreSQL, Prisma

- Built a personal finance dashboard for tracking net worth, budgets, receivables, and payables.
- Implemented account management, budgeting modules, and financial activity tracking.
- Designed net-worth-focused financial views and credit due awareness using statement-day and due-day logic

Inventory and Sales Tracker

Stack: Python (Flask), PostgreSQL, JavaScript

- Developed a web application for inventory monitoring and sales reporting.
- Implemented stock movement tracking and operational reporting dashboards.
- Designed database schema and backend logic for reliable data persistence.

RVerse POS (Android Point-of-Sale)

Stack: Kotlin, Room (SQLite), Bluetooth ESC/POS

- Developed an offline-first Android POS system used for retail checkout operations.
- Implemented cart management, order modifiers, and receipt printing integration.
- Implemented weekly sales reporting and transaction history tracking.
