SUMMARY

Full-stack systems developer and Registered Electronics Engineer building production software for government offices and small businesses. Experienced in workflow systems, document tracking platforms, finance dashboards, inventory systems, and offline-first Android POS applications using React, Next.js, TypeScript, Python, PHP, and PostgreSQL.

SKILLS

Programming: Python, PHP, Kotlin, JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL/MariaDB, SQLite, Prisma

Mobile Development: PWA, Kotlin, Android SDK, Room Database, Bluetooth ESC/POS Printing

Tools & Deployment: Git, GitHub, REST APIs, AWS EC2, Render, Vercel

WORK EXPERIENCE

Ministry of Public Works Regional Office - Systems Developer

2025 – Present

- Designed and deployed a centralized document tracking system used by hundreds of users to manage routing, status monitoring, and document lifecycle tracking.
- Built workflow-aware routing with multi-recipient forwarding, audit trails, and role-based visibility to improve transparency of document movement across divisions.
- Developed internal automation tools to streamline operations, including project title parsing, BARMM acronym expansion, and 80,000+ folder generation.
- Managed system architecture, database design, AWS deployment, and ongoing maintenance of a production platform supporting daily government workflows.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Electronics Engineering - Notre Dame of Marbel University 2024

Registered Electronics Engineer (REE) - Professional Regulation Commission, Philippines 2025

CS50x: Introduction to Computer Science - Harvard University (edX) 2025

PROJECTS

Ministry of Public Works Document Tracker System - PHP, MySQL, JavaScript | Deployed on AWS EC2

- Built a workflow-aware document tracking platform for monitoring document routing, status, and lifecycle.
- Implemented audit trails, document history tracking, and multi-recipient routing.
- Designed role-based access control and assistant delegation features.

RVerse Ecosystem - React, TypeScript, Next.js, PostgreSQL, Prisma, Kotlin, Android | Deployed on Vercel

- RVerse Finance** - Personal finance dashboard for tracking net worth, budgets, receivables, and payables with due-date and statement-day awareness.
- RVerse Inventory** - Inventory and stock monitoring system with stock movement tracking and operational reporting dashboards.
- RVerse POS** - Offline-first Android POS system with cart management, order modifiers, transaction history, and Bluetooth ESC/POS receipt printing.
- RVerse Payroll** - Attendance and payroll tracking tool for small business staff with configurable pay schedules and absence monitoring.
